Stein, C. D., 481.
Stuart, H. O., 466.

Terrence, James, 189.
Thorp, F., Jr., 432.
Tyzzer, E. E., 250.

Waletzky, Emanuel, 365.
Walker, R. V. L., 142, 145, 164, 183, 199, 212.
Wender, S. H., 486.
Willet, Elwin L., 94.

Index of Subjects

A

Activity of Sulfanilamides and Other Compounds in Avian Coccidiosis (Eimeria Tenella), The Relative, 365.
Agalactia in Ergotized Female Rats, Reproductive Failure and, 490.
Anthrax Spores from Vapors of Heated Anthrax Spore Suspensions and from the Distillate from Anthrax Spore Suspensions. Recovery of Viable, 481.
Antimony Compounds, Treatment of Filarial Dermatosis of Sheep with, 350.
Antiviral Activity via the Egg and the Rôle of Congenital Passive Immunity to Newcastle Disease in Chickens, Transmission of, 333.
Attenuated Rinderpest Vaccine Including Some Observations on the Keeping Qualities and Potency Tests, Rinderpest XIV. Immunization Experiments with, 212.
Attenuated Strain of Virus, Rinderpest XIII. The Production of Rinderpest Vaccine from an, 199.
Attenuated Virus Vaccine, Rinderpest XV. Morphological Changes in the Blood of Young Cattle during and after Vaccination with, 222.
Attenuation of Rinderpest Virus for Cattle by Cultivation in Embryonating Eggs, Rinderpest VII. The, 174.
Avian Coccidiosis (Eimeria Tenella), The Relative Activity of Sulfanilamides and Other Compounds in, 365.

B

Blood Constituents of Cows, Average Levels of Various, 450.
Blood of Dairy Cattle, The Carbon Dioxide Content of the, 37.
Blood of Young Cattle During Rinderpest and After Vaccination with Attenuated Virus Vaccine, Rinderpest XV. Morphological Changes in the, 222.
Boar, Studies on Brucellosis in Swine. III. Brucella Infection in the, 379.
Boars, Studies on Brucellosis in Swine. IV. Semen Quality in Brucella Infected, 385.
Bovine Animal during Prenatal Life, Comparative Growth of the Sheep and, 395.
Bovine Pyelonephritis, Bacteriopathology of Infectious, 432.
Bovine Tissue Vaccines, Rinderpest III. Immunization Experiments with Inactivated, 145.
Bronchitis of Chickens, The Effect of Certain Chemical Agents on the Virus of Infectious, 466.
Brucella, The Mucoid Phases of the Genus, 5.
Brucella Suis, Studies on Brucellosis of Swine II. Exposure and Reexposure Experiments with, 11.
Brucellosis of Swine II. Exposure and Reexposure Experiments with Brucella Suis, Studies on, 11.
Brucellosis in Swine. III. Brucella Infection in the Boar, Studies on, 379.
Brucellosis in Swine. IV. Semen Quality in Brucella Infected Boars, Studies on, 385.
Brucellosis of Swine IV. The Unit-Segregation System of Eradication, 21.
Brucellosis in Swine. V. Reproduction Studies with Naturally Infected Sows and Boars, 388.
Buckwheat, The Action of Photosensitizing Agents Isolated from, 486.
Bulls, Experimental Treatment of Trichomonas Foetus in, 417.
(Bunostomum Trigonocephalum) Infections in Lambs Fed an Adequate Diet, Experiments on the Pathogenicity of the Hookworm, 101.

C

Calf Diphtheria, The Etiology of, 41.
Calves to Vaccination against Rinderpest, Rinderpest IX. Neutralization Tests in Rabbits as a Measure of the Immune Responses in, 183.

Carbon Dioxide Content of the Blood of Dairy Cattle, The, 37.
Cat, The Histopathology of Panleucopenia (Agranulocytosis) in the Domestic, 455.
Cattle Associated with Leptospira, A Contagious Disease of, 78.
Cattle, The Carbon Dioxide Content of the Blood of Dairy, 37.
Cattle by Cultivation in Embryonating Eggs, Rinderpest VII. The Attenuation of Rinderpest Virus for, 174.
Cattle, The Histopathology of a Focal Hepatitis and of Its Termination ("Sawdust" and "Telang" Liver) in, 437.
Cattle During Rinderpest and After Vaccination with Attenuated Virus Vaccine, Rinderpest XV. Morphological Changes in the Blood of Young, 222.
Changes in the Equine Larynx Associated with Laryngeal Hemiplegia, 69.
Chemical Agents on the Virus of Infectious Bronchitis of Chickens, The Effect of Certain, 466.
Chemical Changes in the Tissue Following Selenium Administration, The Influence of Protein Diets on Selenium Poisoning II. The, 57.
Chemotherapy of Trichomonas Foetus (Protozoa) in Vitro, 45.
Chicken Embryo and the Chorioallantoic Membrane to Inoculation with Various Strains of Mycobacterium Paratuberculosis, Reaction of the Developing, 470.
Chickens, The Effect of Certain Chemical Agents on the Virus of Infectious Bronchitis of, 466.
Chickens against Newcastle Disease, Immunization of, 307.
Chicks Hatched from Infected Eggs, Rinderpest VI. The Persistence of Virus in, 170.
Chicks to Measure the Concentration of Rinderpest Virus Propagated in Eggs, Rinderpest XII. The Successful Use of Young, 196.
Coccidiosis, Observations on the Prophylactic and Curative Value of Sulfaguanidine in Swine, 94.
Complement Fixation Test for Rinderpest, Rinderpest XVI. 228.
Concentrations of Rinderpest Virus Propagated in Eggs, Rinderpest XII. The Successful Use of Young Chicks to Measure the, 196.
Contagious Disease of Cattle Associated with Leptospira, A, 78.
Cows, Average Levels of Various Blood Constituents of, 450.
Crystal Violet on Vesicular Stomatitis Virus, Effect of Temperature, Phenol, and, 27.
Cultivation of Rinderpest Virus in the Developing Hen's Egg, Rinderpest I. The, 135.
Curative Value of Sulfaguanidine in Swine Coccidiosis, Observations on the Prophylactic and, 94.

D

Developing Hen's Egg, Rinderpest I. The Cultivation of Rinderpest Virus in the, 135.
Developing Hens' Eggs, Rinderpest IV. Infection of the Embryos and the Fluids of, 152.
Diet, Experiments on the Pathogenicity of the Hookworm (Bunostomun Trigonocephalum) Infections in Lambs Fed an Adequate, 101.
Diphtheria, The Etiology of Calf, 41.
Disease of Cattle Associated with Leptospira, A Contagious, 78.
Distillate from Anthrax Spore Suspensions, Recovery of Viable Anthrax Spores from Vapors of Heated Anthrax Spore Suspensions and from the, 481.

E

Egg-Cultivated Virus, Rinderpest V. Attempts to Prepare an Effective Rinderpest Vaccine from Inactivated, 164.
Egg, Rinderpest I. The Cultivation of Rinderpest Virus in the Developing Hen's, 135.
Eggs, Rinderpest VI. The Persistence of Virus in Chicks Hatched from Infected, 170.
Eggs, Rinderpest VII. The Attenuation of Rinderpest Virus for Cattle by Cultivation in Embryonating, 174.
Eggs, Rinderpest XII. The Successful Use of Young Chicks to Measure the Concentration of Rinderpest Virus Propagated in, 196.
(Eimeria Tenella) The Relative Activity of Sulfanilamides and Other Compounds in Avian Coccidiosis, 365.
Embryonating Eggs, Rinderpest VII. The Attenuation of Rinderpest Virus for Cattle by Cultivation in, 174.
Embryos and the Fluids of Developing Hens' Eggs, Rinderpest IV. Infection of the, 152.
Enterotoxemia (Pulpy Kidney Disease) in Lambs by the Use of Alum Precipitated Toxoid, Control of, 355.
Epizoötiology of Newcastle Disease of Poultry, 243.
Equine Larynx Associated with Laryngeal Hemiplegia, Changes in the, 69.
Equine Periodic Ophthalmia, The Relation of Riboflavin to, 403.
Ergotized Female Rats, Reproductive Failure and Agalactia in, 490.
Etiology of Calf Diphtheria, The, 41.

F

Fellowships Available, Research, 384.
Filarial Dermatosis of Sheep with Antimony Compounds, Treatment of, 350.
Fixation Test for Rinderpest, Rinderpest XVI. Complement, 228.
Fluids of Developing Hens' Eggs, Rinderpest IV. Infection of the Embryos and the, 152.
Fowl Plague and Newcastle Disease, The Comparative Pathology of, 250.
Fowl, The Transmission of Lymphomatosis in the, 123.

G

Galapagos Turtles, a Gila Monster, and an Iguana, Salmonella from, 62.
Gila Monster, and an Iguana, Salmonella from Galapagos Turtles, a, 62.
Guinea Pigs to the Virus of Rinderpest, Rinderpest X. The Response of, 189.

H

Hemiplegia, Changes in the Equine Larynx Associated with Laryngeal, 69.
Hen's Egg, Rinderpest I. The Cultivation of Rinderpest Virus in the Developing, 135.
Hepatitis and of Its Termination ("Sawdust" and "Telang" Liver) in Cattle, The Histopathology of a Focal, 437.
Hexachlorethane-Bentonite Suspension for the Removal of the Common Liver Fluke, Fasciola Hepatica, from Sheep, 358.
Hookworm (Bunostomum Trigonocephalum) Infections in Lambs Fed an Adequate Diet, Experiments on the Pathogenicity of the, 101.
Horse, The Tonsils of the, 343.

I

Iguana, Salmonella from Galapagos Turtles, a Gila Monster, and an, 62.
Immune Responses in Calves to Vaccination against Rinderpest, Rinderpest IX. Neutralization Tests in Rabbits as a Measure of the, 183.
Immunity to Newcastle Disease in Chickens, Transmission of Antiviral Activity via the Egg and the Rôle of Congenital Passive, 333.
Immunity Reactions, Rinderpest II. Certain, 142.
Immunization of Chickens against Newcastle Disease, 307.

Immunization Experiments with Attenuated Rinderpest Vaccine Including Some Observations on the Keeping Qualities and Potency Tests, Rinderpest XIV, 212.
Immunization Experiments with Inactivated Bovine Tissue Vaccines, Rinderpest III. 145.
Inactivated Egg-Cultivated Virus, Rinderpest V. Attempts to Prepare an Effective Rinderpest Vaccine from, 164.
Inactivated Bovine Tissue Vaccines, Rinderpest III. Immunization Experiments with, 145.
Infected Eggs, Rinderpest VI. The Persistence of Virus in Chicks Hatched from, 170.
Infection of the Embryos and the Fluids of Developing Hens' Eggs, Rinderpest IV. 152.
Infection of Streptococcus Agalactiae, Reservoirs of, 32.
Influence of Protein Diets on Selenium Poisoning. I., The, 52.
Influence of Protein Diets on Selenium Poisoning. II. The Chemical Changes in the Tissues Following Selenium Administration, The, 57.
Isolation and Identification of Newcastle Disease Virus, 289.

J

Journal Changes Its Make-Up, The, 10.

K

Keeping Qualities and Potency Tests, Rinderpest XIV. Immunization Experiments with Attenuated Rinderpest Vaccine Including Some Observations on the, 212.

L

Lambs Fed an Adequate Diet, Experiments on the Pathogenicity of the Hookworm (Bunostomum Trigonocephalum) Infections in, 101.
Lambs by the Use of Alum Precipitated Toxoid, Control of Enterotoxemia (Pulpy Kidney Disease) in, 355.
Laryngeal Hemiplegia, Changes in the Equine Larynx Associated with, 69.
Leptospira, A Contagious Disease of Cattle Associated with, 78.
Liver Fluke, Fasciola Hepatica, from Sheep, Hexachlorethane-Bentonite Suspension for the Removal of the Common, 358.
Lymphomatosis in the Fowl, The Transmission of, 123.

M

Make-Up, The Journal Changes Its, 10.
Mediums, Rinderpest XI. The Survival of Rinderpest in Various 193.
Morphological Changes in the Blood of Young Cattle During Rinderpest and After Vaccination with Attenuated Virus Vaccine, Rinderpest XV. 222.
Mucoid Phases of the Genus Brucella, The, 5.
Mycobacterium Paratuberculosis, Reaction of the Developing Chicken Embryo and the Chorioallantoic Membrane to Inoculation with Various Strains of, 470.

N

Neutralization Tests in Rabbits as a Measure of the Immune Responses in Calves to Vaccination against Rinderpest, Rinderpest IX. 183.
Newcastle Disease in Chickens, Transmission of Antiviral Activity via the Egg and the Rôle of Congenital Passive Immunity to, 333.
Newcastle Disease, The Comparative Pathology of Fowl Plague and, 250.
Newcastle Disease, Immunization of Chickens against, 307.
Newcastle Disease of Poultry, Epizoötiology of, 243.
Newcastle Disease Virus, Isolation and Identification of, 289.

O

Ophthalmia, The Relation of Riboflavin to Equine Periodic, 403.

P

Panleucopenia (Agranulocytosis) in the Domestic Cat, The Histopathology of, 455.
Pathogenicity of the Hookworm (Bunostomum Trigonocephalum) Infections in Lambs Fed an Adequate Diet, Experiments on the, 101.
Pathology of Fowl Plague and Newcastle Disease, The Comparative, 250.
Persistence of Virus in Chicks Hatched from Infected Eggs, Rinderpest VI. The, 170.
Phenol, and Crystal Violet on Vesicular Stomatitis Virus, Effect of Temperature, 27.
Photosensitizing Agents Isolated from Buckwheat, The Action of, 486.
Poisoning II. The Chemical Changes in the Tissues Following Selenium Administration, The Influence of Protein Diets on Selenium, 57.
Poisoning. I., The Influence of Protein Diets on Selenium, 52.
Potency Tests, Rinderpest XIV. Immunization Experiments with Attenuated Rinderpest Vaccine Including Some Observations on the Keeping Qualities and, 212.
Poultry, Epizoötiology of Newcastle Disease of, 243.
Poultry, Two Examples of Terata in the Caudal Region of Domestic, 477.
Prenatal Life, Comparative Growth of the Sheep and Bovine Animal during, 395.
Production of Rinderpest Vaccine from an Attenuated Strain of Virus, Rinderpest XIII. The, 199.
Prophylactic and Curative Value of Sulfaguanidine in Swine Coccidiosis, Observations on the, 94.
Protein Diets on Selenium Poisoning. I., The Influence of, 52.
Protein Diets on Selenium Poisoning II. The Chemical Changes in the Tissues Following Selenium Administration, The Influence of, 57.
(Protozoa) in Vitro, Chemotherapy of Trichomonas Foetus, 45.
Pyelonephritis, Bacteriopathology of Infectious Bovine, 432.

R

Rabbits as a Measure of the Immune Responses in Calves to Vaccination against Rinderpest, Rinderpest IX. Neutralization Tests in, 183.
Rabbits, Rinderpest VIII. Rinderpest Infection in, 179.
Rats, Reproductive Failure and Agalactia in Ergotized Female, 490.
Reactions, Rinderpest II. Certain Immunity, 142.
Reproduction Studies with Naturally Infected Sows and Boars, Brucellosis in Swine. V., 388.
Reproductive Failure and Agalactia in Ergotized Female Rats, 490.
Research Fellowships Available, 384.
Reservoirs of Infection of Streptococcus Agalactiae, 32.
Response of Guinea Pigs to the Virus of Rinderpest, Rinderpest X. The, 189.
Riboflavin to Equine Periodic Ophthalmia, The Relation of, 403.
Rinderpest I: The Cultivation of Rinderpest Virus in the Developing Hen's Egg, 135.
Rinderpest II: Certain Immunity Reactions, 142.
Rinderpest III: Immunization Experiments with Inactivated Bovine Tissue Vaccines, 145.

Rinderpest IV: Infection of the Embryos and the Fluids of Developing Hens' Eggs, 152.
Rinderpest V: Attempts to Prepare an Effective Rinderpest Vaccine from Inactivated Egg-Cultivated Virus, 164.
Rinderpest VI: The Persistence of Virus in Chicks Hatched from Infected Eggs, 170.
Rinderpest VII: The Attenuation of Rinderpest Virus for Cattle by Cultivation in Embryonating Eggs, 174.
Rinderpest VIII: Rinderpest Infection in Rabbits, 179.
Rinderpest IX: Neutralization Tests in Rabbits as a Measure of the Immune Responses in Calves to Vaccination against Rinderpest, 183.
Rinderpest X: The Response of Guinea Pigs to the Virus of Rinderpest, 189.
Rinderpest XI: The Survival of Rinderpest in Various Mediums, 193.
Rinderpest XII: The Successful Use of Young Chicks to Measure the Concentration of Rinderpest Virus Propagated in Eggs, 196.
Rinderpest XIII: The Production of Rinderpest Vaccine from an Attenuated Strain of Virus, 199.
Rinderpest XIV: Immunization Experiments with Attenuated Rinderpest Vaccine Including Some Observations on the Keeping Qualities and Potency Tests, 212.
Rinderpest XV: Morphological Changes in the Blood of Young Cattle During Rinderpest and After Vaccination with Attenuated Virus Vaccine, 222.
Rinderpest XVI: Complement Fixation Test for Rinderpest, 228.

S

Salmonella from Galapagos Turtles, a Gila Monster, and an Iguana, 62.
("Sawdust" and "Telang" Liver) in Cattle, The Histopathology of a Focal Hepatitis and of Its Termination, 437.
Segregation System of Eradication, Brucellosis of Swine IV. The Unit-, 21.
Selenium Administration, The Influence of Protein Diets on Selenium Poisoning II. The Chemical Changes in the Tissues Following, 57.
Selenium Poisoning. I., The Influence of Protein Diets on, 52.
Semen Quality in Brucella Infected Boars, Studies on Brucellosis in Swine. IV., 385.
Sheep with Antimony Compounds, Treatment of Filarial Dermatosis of. . 350.
Sheep and Bovine Animal during Prenatal Life, Comparative Growth of the, 395.
Sheep, Hexachlorethane-Bentonite Suspension for the Removal of the Common Liver Fluke, Fasciola Hepatica, from, 358.
Sows and Boars, Brucellosis in Swine. V. Reproduction Studies with Naturally Infected, 388.
Stomatitis Virus, Effect of Temperature, Phenol, and Crystal Violet on Vesicular, 27.
Streptococcus Agalactiae, Reservoirs of Infection of, 32.
Sulfaguanidine in Swine Coccidiosis, Observations on the Prophylactic and Curative Value of, 94.
Sulfanilamides and Other Compounds in Avian Coccidiosis (Eimeria Tenella), The Relative Activity of, 365.
Survival of Rinderpest in Various Mediums, Rinderpest XI. The, 193.
Swine Coccidiosis, Observations on the Prophylactic and Curative Value of Sulfaguanidine in, 94.
Swine II. Exposure and Reexposure Experiments with Brucella Suis, Studies on, Brucellosis of, 11.
Swine III. Brucella Infection in the Boar, Studies on Brucellosis in, 379.
Swine IV. The Unit-Segregation System of Eradication, Brucellosis of, 21.
Swine IV. Semen Quality in Brucella Infected Boars. Studies on Brucellosis in, 385.
Swine V. Reproduction Studies with Naturally Infected Sows and Boars, Brucellosis in, 388.

T

Temperature, Phenol, and Crystal Violet on Vesicular Stomatitis Virus, Effect of, 27.
Terata in the Caudal Region of Domestic Poultry, Two Examples of, 477.
Tonsils of the Horse, The, 343.
Toxoid, Control of Enterotoxemia (Pulpy Kidney Disease) in Lambs by the Use of Alum Precipitated, 355.
Transmission of Lymphomatosis in the Fowl, The, 123.
Trichomonas Foetus Infection in Bulls, Experimental Treatment of, 417.
Trichomonas Foetus (Protozoa) in Vitro, Chemotherapy of, 45.
Turtles, a Gila Monster, and an Iguana, Salmonella from Galapagos, 62.

U

Unit-Segregation System of Eradication of Brucellosis of Swine IV., 21.

V

Vaccination with Attenuated Virus Vaccine, Rinderpest XV. Morphological Changes in the Blood of Young Cattle during Rinderpest and after, 222.
Vaccination against Rinderpest, Rinderpest IX. Neutralization Tests in Rabbits as a Measure of the Immune Responses in Calves to, 183.
Vaccine from an Attenuated Strain of Virus, Rinderpest XIII. The Production of Rinderpest, 199.
Vaccine from Inactivated Egg-Cultivated Virus, Rinderpest V. Attempts to Prepare an Effective Rinderpest, 164.
Vaccine Including Some Observations on the Keeping Qualities and Potency Tests, Rinderpest XIV. Immunization Experiments with Attenuated Rinderpest, 212.
Vaccine, Rinderpest XV. Morphological Changes in the Blood of Young Cattle During Rinderpest and After Vaccination with Attenuated Virus, 222.
Vaccines, Rinderpest III. Immunization Experiments with Inactivated Bovine Tissue, 145.
Vesicular Stomatitis Virus, Effect of Temperature, Phenol, and Crystal Violet on, 27.
Virus for Cattle by Cultivation in Embryonating Eggs, Rinderpest VII. The Attenuation of Rinderpest, 174.
Virus in the Developing Hen's Egg, Rinderpest I. The Cultivation of Rinderpest, 135.
Virus in Chicks Hatched from Infected Eggs, Rinderpest VI. The Persistence of, 170.
Virus, Isolation and Identification of Newcastle Disease, 289.
Virus Propagated in Eggs, Rinderpest XII. The Successful Use of Young Chicks to Measure the Concentration of Rinderpest, 196.
Virus of Rinderpest, Rinderpest X. The Response of Guinea Pigs to the, 189.
Virus, Rinderpest XIII. The Production of Rinderpest Vaccine from an Attenuated Strain of, 199.
Virus, Rinderpest V. Attempts to Prepare an Effective Rinderpest Vaccine from Inactivated Egg-Cultivated, 164.
Virus Vaccine, Rinderpest XV. Morphological Changes in the Blood of Young Cattle During Rinderpest and After Vaccination with Attenuated, 222.
